+54 9 221 156419543

La Plata, Buenos Aires, Argentina

## ABOUT ME

I'm a front-end developer and design enthusiast based in Argentina. My passion is creating beautiful and intuitive user interfaces. With extensive experience in ReactJS, as well as a strong foundation in HTML, CSS, and JavaScript, I blend design and code to bring ideas to life. Let's work together to create engaging and visually stunning user experiences!

## EXPERIENCE

### Rather Labs, Inc | Front-end Web Developer

<https://gorather.com>

**2020 - 2021**

Building reusable code and libraries for future use

Optimizing website for maximum speed and scalability

Developing new user-facing features

**Stack: React, Next.JS, TailwindCSS**

### GoSpace AI | Software Developer

<https://www.gospace.com/>

**02/2021 - 04/2023**

Developing multiple user-facing functionalities for the web page, mobile app and Teams chat bot

Optimizing website for better performance and scalability

Refactoring old code to pay off tech debt

Creating PoC's (Proof of concepts) to test new technologies for our product (D3, fabric.js, TeamsFx and more)

Working on a mid layer called BFF (Backend for Frontend), which handles most of the data processing and calls to the different API's, in order to optimize our product's performance

Working on the Teams app version of the product, including its own webapp

**Stack: React, React Native, Typescript, Javascript, Styled Components, Material UI, Nest.js, Three.js, TeamsFx**
